The SEAclic Boxes from Storopack are the ideal solution for companies who ship fish and other fresh foods. The transport solutions with a focus on environmentally conscious and user-friendly design are available in a variety of materials. The SEAclic Box Cycled is made from Styropor® Cycled™ by BASF – an EPS raw material that is manufactured using the innovative ChemCycling™ process in which mixed and contaminated plastics are recycled. In addition to this SEAclic Box model, customers can also opt for boxes in conventional EPS, which can be fully recycled and transformed into new protective packaging.
